<b>Table of Contents</b>	<b>i</b>
<b>List of Figures</b>	<b>viii</b>
<b>List of Tables</b>	<b>xii</b>
<b>A1 Introductory Concepts in Chemistry</b>	<b>1</b>
A1.1 Introduction . . . . .	1
A1.2 The Vocabulary of Chemistry . . . . .	1
A1.3 Element Names and Symbols . . . . .	6
A1.4 Cations, Anions and Regions of the Periodic Table . . . . .	7
A1.5 Naming Inorganic Compounds (Nomenclature) . . . . .	7
A1.6 Fundamental Units of Measurement for Chemistry . . . . .	16
A1.7 Accuracy and Precision . . . . .	17
A1.8 Significant Figures . . . . .	17
A1.9 Multiple Measurements: Averages and Standard Deviations . . . . .	22
A1.10 Logarithms . . . . .	23
A1.11 Mathematics and Chemistry . . . . .	24
A1.12 Solving Problems Using Dimensional Analysis . . . . .	25
A1.13 Molecules, Molecular Formulae, Molecular Mass and Formula Mass . . . . .	28
A1.14 The Mole, Avogadro's Number and Molar Mass . . . . .	30
A1.15 Empirical Formula and Mass Percent . . . . .	33

A1.16	Answers to Exercises A1 . . . . .	41
<b>A2</b>	<b>Chemical Reactions and Stoichiometry</b>	<b>42</b>
A2.1	Introduction . . . . .	42
A2.2	Writing Chemical Equations . . . . .	42
A2.3	Procedure for Balancing Chemical Equations . . . . .	44
A2.4	Stoichiometry and Mass . . . . .	50
A2.5	Determining the Limiting Reagent . . . . .	52
A2.6	Actual, Theoretical and Percent Yield . . . . .	56
A2.7	Elemental Analysis and Empirical Formula . . . . .	59
A2.8	Additional Exercises . . . . .	64
A2.9	Answers to Exercises A2 . . . . .	68
<b>A3</b>	<b>Quantitative Description of Aqueous Solutions</b>	<b>69</b>
A3.1	Introduction . . . . .	69
A3.2	General Characteristics of Aqueous Solutions . . . . .	69
A3.3	Solution Concentration . . . . .	72
A3.4	Mass Percent . . . . .	73
A3.5	Mole Fraction ( $X$ ) . . . . .	74
A3.6	Molarity (M) . . . . .	76
A3.7	Dilution . . . . .	78
A3.8	Reactions Involving Aqueous Solutions . . . . .	81
A3.9	Summary . . . . .	83
A3.10	Additional Exercises . . . . .	84
A3.11	Answers to Exercises A3 . . . . .	88
<b>1</b>	<b>Atomic Structure</b>	<b>89</b>
1.1	Contents in Brief . . . . .	89
1.2	Introduction . . . . .	89
1.3	Subatomic Particles . . . . .	90
1.4	Mass Number, Isotopes and Average Atomic Mass . . . . .	91
1.5	Electromagnetic Radiation: A Useful Probe of Atomic Structure . . . . .	94
1.6	Atomic Line Spectra and the Bohr Model . . . . .	97

1.7	Quantum Mechanics . . . . .	103
1.8	Shapes of Atomic Orbitals . . . . .	109
1.9	Summary . . . . .	113
1.10	Additional Exercises . . . . .	114
1.11	Answers to Exercises 1 . . . . .	119
<b>2</b>	<b>The Periodic Table</b>	<b>121</b>
2.1	Contents in Brief . . . . .	121
2.2	Introduction . . . . .	121
2.3	Pauli Exclusion Principle and Hund's Rule . . . . .	122
2.4	Relative Energies of Atomic Orbitals . . . . .	123
2.5	Electron Configurations . . . . .	126
2.6	Valence and Core Electrons . . . . .	133
2.7	The Periodic Table and Electron Configurations . . . . .	135
2.8	Summary . . . . .	137
2.9	Additional Exercises . . . . .	138
2.10	Answers to Exercises 2. . . . .	140
<b>3</b>	<b>Periodic Properties of the Elements</b>	<b>143</b>
3.1	Contents in Brief . . . . .	143
3.2	Introduction . . . . .	143
3.3	Effective Nuclear Charge . . . . .	144
3.4	Atomic Size . . . . .	145
3.5	The Size of Ions . . . . .	146
3.6	Ionization Energy . . . . .	147
3.7	Electron Affinity . . . . .	151
3.8	Electronegativity . . . . .	152
3.9	Solid State Properties: Metals, Metalloids and Non-Metals . . . . .	154
3.10	Summary . . . . .	154
3.11	Additional Exercises . . . . .	155
3.12	Answers to Exercises 3 . . . . .	158

<b>4</b>	<b>Chemical Bonding</b>	<b>160</b>
4.1	Contents in Brief . . . . .	160
4.2	Introduction . . . . .	160
4.3	Electrostatic Interactions and Ionic Bonding . . . . .	160
4.4	Covalent Bonding . . . . .	163
4.5	Bonding in Ionic Compounds Containing Polyatomic Ions . . . . .	167
4.6	Summary . . . . .	167
4.7	Additional Exercises . . . . .	168
4.8	Answers to Exercises 4 . . . . .	169
<b>5</b>	<b>The Lewis Bonding Model</b>	<b>171</b>
5.1	Contents in Brief . . . . .	171
5.2	Introduction . . . . .	171
5.3	Lewis Structures . . . . .	172
5.4	Procedure for Drawing Lewis Structures (Method 1) . . . . .	178
5.5	Procedure for Drawing Lewis Structures (Method 2) . . . . .	180
5.6	Lewis Structures for Structural Isomers . . . . .	184
5.7	Resonance, Energy Equivalent Structures and “Curly Arrows” . . . . .	186
5.8	Limitations of the Lewis Bonding Model . . . . .	192
5.9	Summary . . . . .	192
5.10	Additional Exercises . . . . .	193
5.11	Answers to Exercises 5 . . . . .	196
<b>6</b>	<b>Molecular Structure and the Valence Shell Electron Pair Repulsion (VSEPR) Model</b>	<b>199</b>
6.1	Contents in Brief . . . . .	199
6.2	Introduction . . . . .	199
6.3	Principles of the VSEPR Model . . . . .	200
6.4	Procedure for Predicting Molecular Shape . . . . .	205
6.5	Summary . . . . .	209
6.6	Additional Exercises . . . . .	211
6.7	Answers to Exercises 6 . . . . .	214

<b>7</b>	<b>Bond Polarity and Molecular Polarity</b>	<b>218</b>
7.1	Contents in Brief . . . . .	218
7.2	Introduction . . . . .	218
7.3	Electronegativity and Bond Polarity . . . . .	219
7.4	Molecular Polarity and Dipole Moment . . . . .	221
7.5	Non-covalent Intermolecular and Inter-ion Interactions . . . . .	223
7.6	Summary . . . . .	229
7.7	Additional Exercises . . . . .	229
7.8	Answers to Exercises 7 . . . . .	231
<b>8</b>	<b>Qualitative View of Acid-Base Equilibria in Aqueous Solution</b>	<b>232</b>
8.1	Contents in Brief . . . . .	232
8.2	Introduction . . . . .	232
8.3	Strong Acids . . . . .	233
8.4	Strong Bases . . . . .	234
8.5	Weak Acids and Weak Bases . . . . .	235
8.6	The Equilibrium Constant . . . . .	238
8.7	Auto-Dissociation of Water . . . . .	240
8.8	$pK_a$ and $pK_b$ . . . . .	241
8.9	Polyprotic Acids . . . . .	247
8.10	Structural Influences on the Magnitude of $pK_a$ and $pK_b$ . . . . .	251
8.11	Summary . . . . .	256
8.12	Additional Exercises . . . . .	257
8.13	Answers to Exercises 8 . . . . .	262
<b>9</b>	<b>Quantitative Acid-Base Chemistry in Aqueous Solution</b>	<b>268</b>
9.1	Contents in Brief . . . . .	268
9.2	Introduction . . . . .	268
9.3	pH and pOH . . . . .	269
9.4	Acid-Base Reactions . . . . .	272
9.5	Titrations Involving Strong Acids and Strong Bases . . . . .	274
9.6	Determining the pH for Solutions of Weak Acids and Weak Bases . . . . .	279
9.7	Solutions of Acidic and Basic Salts . . . . .	287

9.8	Summary . . . . .	290
9.9	Additional Exercises . . . . .	291
9.10	Answers to Exercises 9 . . . . .	293
<b>10</b>	<b>Applications of Acid-Base Equilibria: Buffer Solutions</b>	<b>295</b>
10.1	Contents in Brief . . . . .	295
10.2	Introduction . . . . .	295
10.3	Buffer Solutions from a Weak Acid and Its Conjugate Base . . . . .	296
10.4	Henderson-Hasselbalch Equation . . . . .	300
10.5	Buffering Action . . . . .	302
10.6	Buffer Solutions from Weak Acids (Bases) and Strong Bases (Acids) .	306
10.7	Preparation of Buffer Solutions of a Desired pH . . . . .	310
10.8	Summary . . . . .	316
10.9	Additional Exercises . . . . .	316
10.10	Answers to Exercises 10 . . . . .	319
<b>11</b>	<b>Valence Bond Theory (Hybridization)</b>	<b>320</b>
11.1	Contents in Brief . . . . .	320
11.2	Introduction . . . . .	320
11.3	$\sigma$ Bonds (Sigma Bonds) . . . . .	321
11.4	Hybridizing Atomic Orbitals to Make $\sigma$ Bonds . . . . .	322
11.5	Unhybridized p Orbitals and $\pi$ Bonds . . . . .	324
11.6	Hybridization of Compounds Containing Heavy Metals . . . . .	329
11.7	Compounds Involving Lone Pairs in Hybrid Orbitals . . . . .	330
11.8	Summary . . . . .	335
11.9	Additional Exercises . . . . .	335
11.10	Answers to Exercises 11 . . . . .	338
<b>12</b>	<b>Molecular Orbital Theory</b>	<b>340</b>
12.1	Contents in Brief . . . . .	340
12.2	Introduction . . . . .	340
12.3	Delocalized Electron Model . . . . .	341
12.4	Molecular Orbital Diagram for Dihydrogen . . . . .	342

12.5	Second Row Diatomic Molecules . . . . .	344
12.6	Summary . . . . .	353
12.7	Additional Exercises . . . . .	353
12.8	Answers to Exercises 12 . . . . .	356
<b>13</b>	<b>Coordination Chemistry</b>	<b>358</b>
13.1	Contents in Brief . . . . .	358
13.2	Introduction . . . . .	358
13.3	Lewis Acids and Bases . . . . .	359
13.4	Complex Ions and Transition Metal Coordination Compounds . . . . .	364
13.5	Ligands and Oxidation Numbers of the Central Metal . . . . .	365
13.6	Electron Counting in Transition Metal Complexes . . . . .	371
13.7	Coordination Geometries of Complex Ions . . . . .	373
13.8	Bonding and Electronic Structure of Transition Metal Complexes . . . . .	374
13.9	Magnetic Properties of Transition Metal Complexes . . . . .	376
13.10	Summary . . . . .	378
13.11	Additional Exercises . . . . .	380
13.12	Answers to Exercises 13 . . . . .	382
<b>Index</b>		<b>383</b>
